Indiana Rural Water Association (IRWA)

wishes to thank our Associate Members who have
graciously sponsored our 2011 workshops.

- LOOK FOR THE WINDMILL

Indiana Rural Water Association's icon, the windmill, has been around for thousands of years and it continues to symbolize **IRWA's** mission and dedication to the industry that we all so proudly serve.

The windmill's humble beginnings can be traced back to the need to pump water in ancient Persia (about 500 – 900A.D.) The design of this timeless invention has continued to change and evolve – serving many needs in the daily lives of those past and present.

Indiana Rural Water Association is committed to serving you and the ever changing needs of our industry. We offer you the promise, and we have the drive, to succeed in this mission despite daunting (and sometimes puzzling) obstacles.

We ask for your continued support of **IRWA**, and of each other, as we work together to provide the best water environment possible for our family, friends, and neighbors – today and in the future.

If we can be of any assistance, please contact
the staff or any of our Directors.

For over 45 years Artesian of Pioneer has been an equipment manufacturer, an installer, a servicer, a consultant and a friend to cities, towns, counties and water districts all over the Midwestern United States. It takes time and dedication to earn a reputation for quality and service. We have done that by honestly assessing each water provider's needs and only building and installing the highest quality products available in the Industry today. We believe in building water plants to last 50 years with easy to understand operation, very little maintenance and zero project change orders and headaches.

Our hands on approach to excellence has been inspired and perfected by our own experience managing municipal and private water systems for more than 30 years. Please call us today to receive an honest, expert opinion of your water system. But don't take our word for it, you can ask dozens of our clients spanning multiple states and decades of time. Please call or email me at your convenience. I would be happy to assist you with any water treatment issues your system is experiencing.

providing solutions for your utility challenges

CAMPBELL KYLE PROFFITT LLP has aggressively served water and wastewater treatment utilities for decades. We represent utilities in all phases to include land acquisition, a condemnation if necessary, facility development and sustainment, board development, Public Access and assisting the utility with the collection process, where required. We've represented clients throughout the state of Indiana, and, if needed, can assist regional utility companies in contiguous states. We have the legal team including trained para-professional staff and the latest technology to provide each utility with the most cost effective and efficient solution to its utility challenges. Whether your entity is concerned with water treatment, potable water purification, the removal of contaminants from untreated water or sewage treatment, the attorneys at Campbell Kyle Proffitt LLP have the expertise to successfully represent clients through the entire life cycle of the utility.

Layne Christensen's Water Resources Division provides a full line of water-related services and products including hydrological studies, site selection, well design, drilling and well development, pump installation, and repair and maintenance. The division's offerings include the design and construction of water treatment facilities and the manufacture and sale of products to treat volatile organics and other contaminants such as nitrates, iron, manganese, arsenic, radium and radon in groundwater.

With the acquisition of Reynolds in September 2005, Layne expanded its capabilities in the areas of the design and build of water and wastewater treatment plants, Ranney® collector wells, sewer rehabilitation and water and wastewater transmission lines.

Midwestern Engineers, Inc. established in 1959,
provides consulting engineering services for:

Water - Wastewater - Stormwater -
Electrical - HVAC - Building Design -
Utility Relocations - Site Development -
Downtown Enhancements & Streetscapes -
Park & Recreational Facilities

Our motto "A Firm Commitment to Our Clients"
means we are fully committed in assisting our clients
with the challenges and issues facing their
community. This is accomplished with a highly
qualified staff working together as a team while using
good work ethics.

Midwestern Engineers, Inc. uses a common sense
approach in developing, planning and designing
projects for our clients. Our staff utilizes the latest
technologies and engineering equipment including
CADD for drafting and design; computerized
hydraulic modeling and sound engineering judgment
providing clients with projects that are completed
within budget and in a timely manner.
