Integrity:

*“That’s when you’re
good even when
nobody’s looking!”*

*IRWA’s mission since
our founding in 1968,
has been to provide
education and technical
assistance to water
and wastewater systems
in Indiana.*

*Our icon, the Windmill,
continues to symbolize
our mission and our
commitment to this
industry that we all so
proudly serve.*

Indiana Rural Water Association presents Confined Space Entry — October 31, 2019 — Rossville, Indiana

Information covered in this workshop will be:

Confined space readiness is the first step to almost any job water and wastewater facilities face. Whether changing pumps, laying sewer lines, etc., the very first step is entering the confined space in which it is housed. To maintain the safety and integrity of the water or wastewater system, operators and others performing these tasks need proper training on the step-by-step guides on getting in and out of confined spaces.

Every person involved in the confined space entry (entrant, attendant, and entry supervisor) must be trained in the hazards associated with a confined space, signs and symptoms of exposure, and the proper use of gas monitoring equipment and forced air blowers, among others.

This workshop will cover the following:

- ◇ Introduction, Objectives, History of OSHA Standards
- ◇ High Cost of Confined Space Deaths and Confined Space Standards
- ◇ Protective Systems and How To Use Them
- ◇ CSE Guidelines and Checklists
- ◇ On the Job Use and Rescues
